About me

Dynamic leader with a background in Business Information Technology, specializing in programming, data analysis, and networking. As CEO of Chemusian Dairy Farmers Cooperative and Uasin-Gishu Livestock Breeders Marketplace, demonstrated success in driving agricultural innovation and growth. With a focus on the intersection of business and technology, seeks opportunities to leverage expertise in IT, business, or agriculture, particularly in roles requiring programming skills, networking, and innovative thinking.

Experience

CEO, Chemusian Dairy Farmers Cooperative   Jan 2023 - Present
Eldoret, Kenya
- Led the cooperative in implementing sustainable agricultural practices and innovative solutions to improve dairy farming productivity.
- Spearheaded technology-driven strategies that streamlined operations, enhanced member engagement, and drove revenue growth

CEO, Uasin-Gishu Livestock Breeders MarketPlace   Jan 2023 - Present
Eldoret, Kenya
- Managed the strategic direction and operational execution of the marketplace, focusing on expanding livestock trade and supporting breeders through advanced marketing and sales platforms.
- Established partnerships with key stakeholders to position the marketplace as a leader in the livestock industry.

Intern, Data Science Academy   Feb 2023 - Aug 2023
iLab Africa, Nairobi, Kenya
- Gained extensive experience with tools like Google Earth and Power BI, contributing to projects.
- Played a crucial role in data analysis, generating insights that informed strategic decisions in sustainability projects.

Co-Founder, ACH   Feb 2024 - Present
Nairobi, Kenya
- Founded a youth-driven initiative focusing on integrating technology in agriculture to enhance sustainability and innovation in African farming practices.
- Led projects aimed at solving agricultural challenges through the application of modern technology

Volunteering

Kenyatta National Hospital   Jan 2023 - May 2023
Nairobi, Kenya
- Provided customer service at wards, day care unit, and corporate clinic
- Attended to patient inquiries and directed them to relevant departments
- Ensured quality healthcare service delivery
- Maintained patient records and managed appointment schedules
- Communicated with hospital staff for efficient patient care
- Assisted nurses and doctors with patient handling and record management
